Howard, my memory is not what it once was (it was fantastic when I was your age). I can't remember if you have the foundations files I started when Jerry had those ~~index~~ he had. Because I also do a fair amount of misfiling, often because the file space is so overcrowded, I spent time this a.m. looking for them. The one thing I have in abundance is cheap paper. I think it would be better in the future if you put a slip in the right place indicating you hav have whatever files you borrow. That will reduce the burden on my memory and avoid this kind of waste of time. I have no urgent need for these files now, so there is no need to mail them back. It is only that I didn't find them when I decided to start one on the Littauer Foundation. HW 4/8/73
